

## Reincarnation Exhibit Recycling Program

The Evo Element Reincarnation Exhibit Recycling Program is designed to reduce the volume of retired exhibit materials reaching landfills. The program features the recycling of nearly every exhibit material, including:

- > **Aluminum**
- > **Plastic**
- > **Wood**
- > **Particle Board**
- > **Corrugated Cardboard**
- > **Fabric**
- > **Metal**
- > **Laminate**
- > **Nylon**
- > **Velcro**
- > **Paper**
- > **Styrofoam**
- > **Foam Packing Material**
- > **Carpet**

Simply send your old, used, and unwanted exhibits to our specified recycling facility, and for a small fee, we will completely recycle your display.

We will break down the display into different material categories, and recycle all the different components separately.

To receive a quotation for our Reincarnation Exhibit Recycling Service, send us photos of your exhibit and crates. Evo is committed to the sustainability, we will offer a 50% credit of the reincarnation cost toward a purchase of a new sustainable exhibit of similar size from Evo, and a 25% credit toward the purchase of a traditional exhibit of similar size.
